

One in every fifteen people living in the United States depends on health center services. Health Centers deliver high quality, cost effective, accessible care while serving as critical economic engines helping to power local economies.

Health Centers are also proud to celebrate over 50 years of service and continue to be ranked among the highest quality and cost effective care providers in the nation. Health Centers provide services to all people, regardless of their ability to pay or insurance status.

Each year Sea Mar Community Health Centers celebrates the work and services our own Health Centers provide to our communities by hosting a variety of FREE activities, screenings, resources and more throughout National Health Center Week.

Find your local Sea Mar Medical Clinic below and see what we have planned for the week!
